SUBJECT INDEX

acetylcholine release - influenced by minaprine, 301
- supressed by serotonin, 301
acetylcholine binding sites - in insects, 287
acetylcholine metabolism - in Zucker fatty rat, 99
acetylcholine receptors - endogenous polypeptide, 287
acetylcholinesterase - in cerebrospinal fluid, 533
adenosine deaminase, 211, 223
adenosine - a neurotransmitter, 223
- formation and inactivation, 227
- neuroregulator in the CNS, 211
- transport, 211
adrenalectomy - effect on D_2 dopamine receptors in neostriatum, 275
β-adrenergic receptors - effect of d-methylamphetamine, 17
aging - effect on soluble and membrane bound enzymes, 369
aging brain - chemical anatomy, 437
- increase in peroxidative products, 369
aging - cerebrospinal fluid, 533
alcohol administration - effect on 5-hydroxytryptamine uptake and membrane lipids, 89
amino acid release - from granule cells in culture, 119
3-amino-1-methyl-5H-pyrido(4,3-6)indole - inhibitor of MAO, 51
anoretic agents - action on serotonin neurones, 309
- CM 57227 and CM 57373, 309
aspartate release - effect of dopamine receptor ligands, 253
- from primary cultures, 119
- from substantia nigra, 253
- mediated by sulphur amino acids, 119
^{3}H-aspartate - release, 253
astrocytes - heterogeneity, 237
astroglia, 237
astroglial cells - monoclonal antibodies, 501
ATP - a neurotransmitter, 223
axonal transport - of ^{3}H-noradrenaline, 523

benzodiazepine/GABA complex, 187
binding - for 5-HT_1 sites, 507
- of glutamate, 173
- of ^{3}H-N-propylnorapomorphine to neostriatum, 275
- of ^{3}H-ouabain, 193
- of ^{3}H-paroxetine, 247
- sites for acetylcholine, 287
- to δ-opioid sites, 341
bioflavonoids - effect on exocytosis of catecholamines, 313
BMY 7378 - agonist for 5-HT_{1a} receptors, 515
branchial stimulation - effect on glycogen levels, 115
α-bungarotoxin - monoclonal antibodies, 163
[^{35}S]t-butylbicyclophosphorothionate - chloride channel antagonist, 187
butyrylcholinesterase - cerebrospinal fluid, 533

calcium concentrations - studies with Fluo-3, 89
canberra metric, 419
catecholamine release - effect of protein kinase C inhibitors, 313

catecholamines - release from chromaffin cells, 313
cerebellar granule cells - in culture, 119
cerebrospinal fluid, 533
cerebrospinal fluid - from unanaesthetised rabbits, 263
- in aging brain, 533
- presence of acetylcholinesterase and butyrylcholinesterase, 533
- presence of myelin-like protein, 549
K^+ channel - influenced by minaprine, 301
cholecystokinin-8 - modulation of D_2 dopamine receptors, 275
cholesterol esters - composition in brain, 157
cholinergic neurones - effect of MPTP, 319
CM 57227 - anorectic agent, 309
CM 57373 - anorectic agent, 309
coexistence of neurotransmitters, 479
communication - in the CNS, 479
cultures - of oligodendrocytes, 27
- of glioblasts, 133
cytoskeletal regulation - rat glial differentiation, 133
cytosolic free calcium - in synaptosomes, 105
C-AMP - effect of estradiol on noradrenaline stimulation, 1
C-GMP levels - affected by polyamines, 199

α-dendrotoxin - potassium channel blocker, 105
dialysis - of dopamine release, 281
dialysis/perfusion - of hippocampus, 263
dolichol-bound carbohydrates - ^{3}H-mannose incorporation - 295
- influenced by serum, 295
dopamine - immunohistochemical localisation, 383
dopamine - in vivo release, 281
dopamine ligands - effect on aspartate release, 253
D_2-dopamine receptors - in aging brain, 437
- in retina, 73
- modulated by neurotensin and cholecystokinin-8, 275
dopamine release - effect of TRH, 281
- influenced by muscarinic receptors, 281
dopamine - action on serotonin-N-acetyltransferase activity, 73
- decreases forskolin-induced stimulation of C-AMP, 73
dopaminergic receptors - effects of d-methylamphetamine, 17
^{3}H-dstbulet - binding to δ-opioid site, 341
-enkephalin analogue, 341

endogenous polypeptide - affects acetylcholine binding, 287
enkephalin binding, 341
estradiol - effects on noradrenaline receptors, 1
- in hippocampus, 1
ethanol - affects binding of chloride channel antagonist, 187
excitatory amino acids - effect of modulators, 65
- stimulation of inositol phosphates, 65
exocytosis - of catecholamines, 313
extracellular fluid - from brain, 263
- proteins, 263
fatty acid - composition in brain, 157
- content in mylination, 27
ferrous ion - activates tyrosine hydroxylase, 59
Fluo-3 - fluorescent indicator for measuring free calcium concentrations, 89
forskolin-induced stimulation of C-AMP - effect of dopamine, 73
GABAergic neurones - affected by x-irradiation, 331
- effect of MPTP, 319
GABA/benzodiazepine complex, 187
gangliosides - effect on brain, 469
- in insulin-induced hypoglycemia, 469
- involvement in ischemia, 469

GFAP immunoreactivity, 427
glial maturation factor, 133
glial cells - glial maturation factor, 133
glial differentiation - cytoskeletal regulation, 133
glioblasts - cultures, 133
glutamate receptor subtypes 11, 2
glutamate receptors - in noradrenaline release, 2
glutamate binding sites - solubilization, 173
glycogen - concentrating in brain, 115
- effect of photic stimulation, 115
-effect of afferent branchial stimulation, 115
heterocyclic amines - inhibitors of MAO, 51
^{3}H-5-hydroxytryptamine uptake - effect of alcohol, 89
- in platelets, 89
5-HT_1 binding site - in spinal cord, 507
5-HT_{1a} receptors - BMY 7378 a partial agonist, 515
hypothalamus - estradiol effects on noradrenaline receptors, 1

image analysis - microdensitometric methods, 383
immunohistochemistry - localisation of dopamine stores, 383
inositol phosphates - stimulation by excitatory amino acids, 65
insulin related material - from various tissues, 41
insulin-induced hypoglycemia - involvement of gangliosides, 469
intrasynaptosomal free calcium, 89
ischemia - in rats, 451
- involvement of gangliosides, 469
- neural plasticity, 451

lipid composition - effect of alcohol, 89
locus coeruleus neurones - ^{3}H-noradrenaline transport, 523

malnourished children - fatty acid and cholesterol esters in brain, 157
^{3}H-manmose - incorporation into dolichol derivatives and proteins, 295
MAO inhibitor - 3-amino-1-methyl-5H-pyrido(4,3-6)indole, 51
MAO inhibitors - heterocyclic amines, 51
MAO - in human brain synaptosomes, 51
MAO = monoamine oxidase
d-methylamphetamine - effect on β-adrenergic and dopaminergic receptors, 17
-involvement in supersensitivity, 17
microdensitometry - analysis of plasticity in the CNS, 383
microdialysis technique, 427
minaprine - possible effects on 5-HT_2 receptor and K^+ channel, 301
modulators - of excitatory amino acid-induced stimulation of inositol phosphates, 65
monoclonal antibodies - to α-bungarotoxin, 163
- to astroglial cells, 501
MPTP - effect on cholinergic and GABAergic neurones, 319
MPTP = 1-methyl-4-phenyl-1,2,3,6-tetrahydropyridine, 319
muscarinic cholinergic receptors - in forebrain, 81
- effect of unilateral decortication, 81
- influence release of dopamine, 281
myelin basic-like protein - in cerebrospinal fluid, 549
myelin-like protein - in cerebrospinal fluid, 549
myelination - in vitro studies, 27
- lipid and fatty acid contents, 27

neural plasticity - in the CNS, 383, 419, 427, 437, 451, 469, 479
neuroanatomy - numerical classification, 419
neuropeptide distribution - in different brain areas, 419
neurotensin - modulation of D_2 dopamine receptors, 275
neurotransmitters - coexistence, 479
nicotine - increased tyrosine hydroxylase activity, 269

- increases noradrenaline synthesis in hippocampus, 269
NMDA receptors - influenced by spermine, 199
- influenced by polyamines, 199
- influenced by spermidine, 199
non-synaptic transmission, 479
noradrenaline receptors - effect of estradiol, 1
noradrenaline synthesis - affected by nicotine, 269
noradrenaline release - involvement of glutamate receptors, 2
noradrenaline - stimulation of C-AMP, 1
^{3}H-noradrenaline - axonal trnsport, 523
- transport in Locus coeruleus neurons, 523

oligodendrocyte - cultures, 27
oligodendroglial membranes - phosphatidylinositol turnover, 141
- phosphoproteins, 141
δ-opiate receptors - in aging brain, 437
δ-opioid binding sites, 341
δ-opioid sites - binding of ^{3}H-dstbulet, 341
^{3}H-ouabain binding - to ox brain membranes, 193

^{3}H-parxetine - serotonin uptake inhibitor, 247
peptides - as neurotransmitters, 479
peroxidative products - increase in aging brain, 369
phorbol esters - action on stimulation of inositol phosphates, 65
phosphatidylinositol turnover - in oligodendroglial membranes, 141
phosphoproteins - in oligodendroglial membranes, 141
photic stimulation - effect on glycogen concentration, 115
platelets - effect of alcohol administration, 89
polar lipids - content in myelination, 27
polyamines - modulate NMDA and quisqualate receptors, 199
- effect C-GMP levels, 199
polypeptide - specific form modulates binding sites for acetylcholine, 287
polysomes - from postmortem brains, 147
- protein synthesis, 152
potassium channel blocker - α-dendrotoxin, 105
primary cultures - of cerebellar granule cells, 119
protein kinase C inhibitors - on release of catecholamines, 313
protein synthesis - in human brain polysomes, 152
proteins - affected by x-irradiation, 331
- from extracellular fluid, 263
^{3}H-N-propylnorapomorphine - binding to D_2 dopamine sites, 275
purinergic neurones, 223
purinergic neuroregulation, 211
purinergic transmission, 233
purines, 211

radioimmunoassay - of a myelin-like protein, 549
5-HT_2-receptor - affected by minaprine, 301
receptors - effect of estradiol on α_1-type receptors, 1
receptors - in aging brain, 437
release - of aspartate, 253
retina - presence of D_2-dopamine receptors, 73
- serotonin-N-acetyltransferase activity, 73
retrograde axonal transport - of ^{3}H-noradrenaline, 523

serotonin metabolism - influence of tetrahydrobiopterin, 335
serotonin neurones - effect of anorectic agents, 309
serotonin release - influence of tetrahydrobiopterin, 335
serotonin uptake inhibitor - paroxetine, 247
serotonin - metabolism and release in synaptosomes, 335
- reduces acetylcholine release, 301
- synthesis and release, 335
serotonin-N-acetyltransferase activity - in retina, 73
shannon diversity index, 419

spermidine - modulate NMDA and quisqualate receptors, 199
spermine - modulate NMDA and quisqualate receptors, 199
substantia nigra - release of aspartate, 253
sulphur amino acids - effect on aspartate release, 119
supersensitivity - of β-adrenergic and dopaminergic receptors, 17
synaptic vesicle - protein in Torpedo and bovine brain, 533
synaptosomes - calcium concentrations, 105
- of human brain, 51
- serotonin metabolism and release, 335
- α-dendrotoxin binding sites, 105

tetrahydrobiopterin - action on serotonin synthesis and release, 335
Torpedo brain - proteins of synaptic vesicles, 533
transient forbrain ischemia - in rats, 451
transport sites - for adenosine, 211
TRH - effect on the release of dopamine, 281
TRH = thyrotropine-releasing hormone
tyrosine hydroxylase - activation by ferrous ions, 59
- activity increased by nicotine, 269
- in hippocampus, 269
tyrosine hydroxylase immunoreactivity - in aging brain, 437

volume transmission, 479

wiring transmission, 479

x-irradiation - affects proteins and GABAergic neurones, 331
- of rats, 331

YM-14673 - TRH analogue, 281

zucker fatty rat - acetylcholine metabolism, 99

PRINTED IN GREAT BRITAIN BY BPCC-AUP ABERDEEN LTD
